

Girijananda Chowdhury University
Formative Assessment-I, Semester: 4th
Department of Civil Engineering
Subject: Surveying & Geomatics

Set-1

Maximum Marks: 20

Time: 1 hour

(5 × 1 = 5 Marks)

Q1. Fill in the blanks

1. The Engineers chain is _____ m long.
2. The line joining two survey stations is called _____.
3. The horizontal angle measured clockwise from north is called _____.
4. In levelling, the line of sight is also called _____ line.
5. Contours of equal elevation never _____ each other.

(3 × 3 = 9 Marks)

Q2. Short Answer Questions

1. Define survey stations and survey lines.
2. Explain the principle of levelling.
3. What is ranging? Explain how chain can be affected by different environmental conditions with respect to its manufacturing conditions.

(1 × 6 = 6 Marks)

Q3. Long Answer Question

What do you understand by contouring? State how a hilly region and a depression is expressed by contouring.

Time: 1 hour

Set-3
Maximum Marks: 20

Q1. Fill in the blanks

(5 × 1 = 5 Marks)

1. The bearing measured with respect to magnetic north is called _____ bearing.
2. The process of determining elevation differences is known as _____.
3. The line perpendicular to the plumb line is called _____ plane.
4. Theodolite is mainly used for measuring _____ and _____ angles.
5. The radius of the earth is more than _____ in geodetic surveying

Q2. Short Answer Questions

(3 × 3 = 9 Marks)

- a) Define bearing of survey lines and types of bearings.
- b) Explain the principle of chain surveying.
- c) Define Horizontal axis, Line of sight and Face left in theodolite surveying

Q3. Long Answer Question

(1 × 6 = 6 Marks)

Explain the process of on field chaining by using a 20 m long metric chain.
